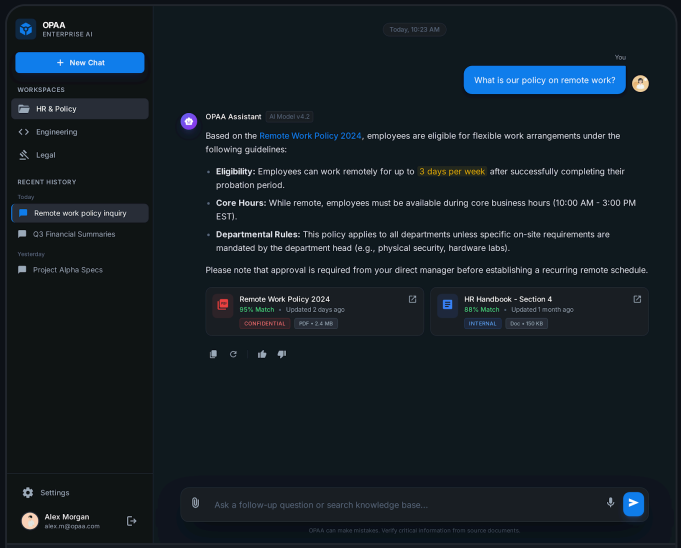
OPAA

OPEN SOURCE • SELF-HOSTED • APACHE 2.0

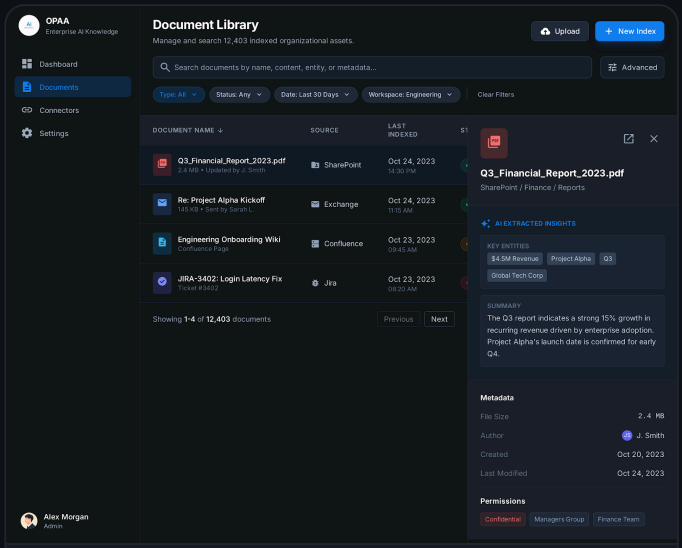
Your Company Knowledge. One Question Away.

OPAA connects wikis, emails, SharePoint, issue trackers and file shares into one intelligent assistant. Ask in natural language — get answers with source references. Self-hosted, no data ever leaves your network.



AI Chat with Sources

Ask a question, get answers with original documents and confidentiality levels



Document Browser

All sources searchable in one place — with AI-extracted insights

Digital Sovereignty

All data stays in your infrastructure. No cloud dependency.

No Vendor Lock-in

Every component is swappable — LLM, database, data sources.

Always with Sources

Every answer links to the original document. No guessing, no hallucinations.

Your Branding

Logo, colors, theme and AI model fully configurable.

Open Source

Apache 2.0 license. No license fees. Community-driven.

OPAA VS. TYPICAL SAAS SOLUTIONS

	OPAA	SAAS ALTERNATIVES
Data Ownership	✓ Everything stays with you	✗ Data in third-party cloud
AI Model	✓ Your choice (OpenAI, Ollama, local)	✗ Predetermined, not changeable
Data Sources	✓ Wikis, email, issue trackers, S3, SharePoint ...	✗ Usually own platform only
Source References	✓ Every answer with original document	✗ Often a black box
Cost	✓ Open Source — no license fees	✗ Per-user licensing

React 19 · TypeScript · Java 21 · Spring Boot · Spring AI · PostgreSQL + pgvector · Docker
